

CHEMICAL HERITAGE FOUNDATION

DEAN H. KEDES

The Pew Scholars Program in the Biomedical Sciences

Transcript of an Interview
Conducted by

David J. Caruso

at

University of Virginia

on

25 and 26 October 2007

(With Subsequent Corrections and Additions)

ACKNOWLEDGEMENT

This oral history is part of a series supported by a grant from the Pew Charitable Trusts based on the Pew Scholars Program in the Biomedical Sciences. This collection is an important resource for the history of biomedicine, recording the life and careers of young, distinguished biomedical scientists and of Pew Scholars Program in the Biomedical Sciences Advisory Committee members.

This oral history is made possible through the generosity of

CHEMICAL HERITAGE FOUNDATION
Oral History Program
FINAL RELEASE FORM

This document contains my understanding and agreement with the Chemical Heritage Foundation with respect to my participation in the audio-recorded interview conducted by David Caruso on 25 and 26 October 2007. I have read the transcript supplied by Chemical Heritage Foundation.

1. The audio recording, corrected transcript, photographs, and memorabilia (collectively called the "Work") will be maintained by the Chemical Heritage Foundation and made available in accordance with general policies for research and other scholarly purposes.
2. I hereby grant, assign, and transfer to the Chemical Heritage Foundation all right, title, and interest in the Work, including the literary rights and the copyright, except that I shall retain the right to copy, use, and publish the Work in part or in full until my death.
3. The manuscript may be read and the audio recording(s) heard by scholars approved by the Chemical Heritage Foundation subject to the restrictions listed below. The scholar pledges not to quote from, cite, or reproduce by any means this material except with the written permission of the Chemical Heritage Foundation.
4. I wish to place the conditions that I have checked below upon the use of this interview. I understand that the Chemical Heritage Foundation will enforce my wishes until the time of my death, when any restrictions will be removed.

Please check one:

a. _____

No restrictions for access.

NOTE: Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to obtain permission from Chemical Heritage Foundation, Philadelphia, Pennsylvania.

b. _____

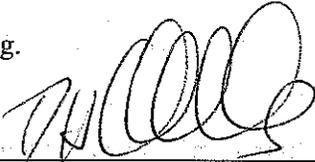

Semi-restricted access. (May view the Work. My permission required to quote, cite, or reproduce.)

c. _____

Restricted access. (My permission required to view the Work, quote, cite, or reproduce.)

This constitutes my entire and complete understanding.

(Signature) _____

Dean H. Kedes

(Date) _____

This interview has been designated as **Free Access**.

One may view, quote from, cite, or reproduce the oral history with the permission of CHF.

Please note: Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to credit CHF using the format below:

Dean H. Kedes, interview by David J. Caruso at the University of Virginia,
Charlottesville, Virginia, 25-26 October 2007 (Philadelphia: Chemical Heritage
Foundation, Oral History Transcript # 384).

Chemical Heritage Foundation
Oral History Program
315 Chestnut Street
Philadelphia, Pennsylvania 19106

The Chemical Heritage Foundation (CHF) serves the community of the chemical and molecular sciences, and the wider public, by treasuring the past, educating the present, and inspiring the future. CHF maintains a world-class collection of materials that document the history and heritage of the chemical and molecular sciences, technologies, and industries; encourages research in CHF collections; and carries out a program of outreach and interpretation in order to advance an understanding of the role of the chemical and molecular sciences, technologies, and industries in shaping society.

DEAN H. KEDES

1960 Born in Stanford, California on 20 February

Education

1981 B.Sc., Stanford University
1988 M.D., Yale University
1988 Ph.D., Molecular Biophysics and Biochemistry, Yale University

Professional Experience

Stanford University
1988-1991 Internship and Residency, Internal Medicine Stanford University

University of California, San Francisco, laboratory of Donald Ganem
1991-1992 Howard Hughes Medical Institute Associate
1992-1993 Infectious Diseases Clinical Fellow
1993-1996 Howard Hughes Medical Institute Post-doctoral Physician
Scientist
1997-1998 Assistant Research Microbiologist

University of Virginia
1999-2004 Assistant Professor, Division of Infectious Diseases, Department
of Internal Medicine, and Department of Microbiology
1999-present Member, University of Virginia Cancer Center
1999-present Member, Bernie B. Carter Center for Immunology Research
1999-present Member, Myles H. Thaler Center for AIDS and Human
Retrovirus Research
2004-present Associate Professor, Division of Infectious Diseases, Department
of Internal Medicine, and Department of Microbiology

HONORS

1981 Honors in Biology, Stanford University
1981-1988 Medical Scientist Training Program Award (NIH), Yale University
1986 National MD/PhD Program Conference Award
1993-1996 Howard Hughes Medical Institute Research Physician Scientist Award (1
of 20)

1996-1998	University-wide AIDS Research Program Post-doctoral Award
2000-2005	Doris Duke Clinical Scientist Award (1 of 17)
2000-2004	Pew Scholar in the Biomedical Sciences (1 of 20)
2003-2004	Elizabeth Glaser Pediatric AIDS Basic Science Award (1 of 8)
2004	Recognition of Excellence as Basic Science Section Leader
2005	Recognition of Excellence as Basic Science Section Leader

ABSTRACT

Dean H. Kedes' oral history begins with a discussion of his childhood and family life. Heavily influenced by his father, also a biomedical scientist, Kedes developed an interest in science early in life. He would visit his father's laboratory at Stanford University often and he became aware of its friendly and productive atmosphere. During his youth, he traveled abroad with his family in support of his father's research. Time spent in Italy and England, while also traveling to other parts of Europe, proved enriching. Kedes applied to college while in Europe and he subsequently chose to attend Stanford University. Upon matriculation, though, the 'living on campus' experience made it seem as if he had gone to school farther away from home than was actually true. Starting from enrollment, Kedes pursued a major in biology with the intention of applying to medical school. His coursework and laboratory research in the neurobiology laboratory of Eric Shooter, however, increased his interest in pursuing basic science as well. Kedes decided to undertake a joint MD/PhD program at Yale University. After an uninspiring first laboratory rotation working on a descriptive *Drosophila* project, Kedes eventually joined the laboratory of Joan A. Steitz to study pre-mRNA splicing. Upon earning his MD/PhD, Kedes returned to Stanford University to undertake his clinical residency, though he experienced difficulty transitioning between laboratory research and clinical medicine. After completing his residency, Kedes built upon his laboratory research with post-doctoral studies in Donald Ganem's laboratory at the University of California, San Francisco. There Kedes developed his interests in the molecular biology of infectious diseases including Hepatitis B and Kaposi's Sarcoma-associated Herpes Virus (KSHV). Following his successful work with Ganem, Kedes was offered a position at the University of Virginia—a location at which both he and his wife could find work—and began the 'thrill and excitement' of running his own laboratory. Throughout the interview Kedes emphasized the importance of balancing family life with laboratory work and creating a positive atmosphere within the laboratory, something that he works hard to maintain at the University of Virginia. Shortly after becoming a principal investigator, Kedes was awarded a Pew Scholars Program in the Biomedical Sciences award and he reflected upon the importance of the award with respect to scientific funding and collaboration. Kedes also discussed funding in the United States more broadly, especially the problem of the attrition of science students due to a lack of funds as well as the national push towards translational research. The interview concluded with Kedes' reflections on the field of biomedical science, on scientific publishing, and on the public perception of science.

INTERVIEWER

David J. Caruso earned a B.A. in the History of Science, Medicine, and Technology from the Johns Hopkins University in 2001 and a Ph.D. in Science and Technology Studies from Cornell University in 2008. His graduate work focused on the interaction of American military and medical personnel from the Spanish-American War through World War I and the institutional transformations that resulted in the development of American military medicine as a unique form of knowledge and practice. David is currently the Program Manager for Biomedical Sciences and Technologies at the CHF. His current research interest focuses on the discipline formation of biomedical science in 20th-century America and the organizational structures that have contributed to such formation.

TABLE OF CONTENTS

Childhood and Early Education	1
Father's biomedical influence. Interest in science. Years spent in Europe. Exposure to laboratory camaraderie.	
College Education	8
Applying from Europe. Stanford University. Living on-campus. General requirements. Developmental Biology course. Neurobiology research with Eric Shooter. Interest in medicine and basic science.	
MD/PhD Program and Residency	14
Choosing Yale University. Laboratory rotations. Joan A. Steitz and <i>Drosophila</i> research. Exposure to science and medicine in the 1980s. Kaposi's sarcoma. Residency at Stanford University. Difficulty transitioning between clinical medicine and laboratory research.	
Post-doctoral Research	31
Donald Ganem's laboratory at University of California, San Francisco. Molecular Biology and Infectious Diseases. Hepatitis B and Kaposi's Sarcoma Associated Herpes Virus research. Family life.	
Principal Investigator	50
Looking for jobs with wife Margo Roberts. University of Virginia. Excitement of running the laboratory. MD/PhD Program. Mentoring relationships. Departmental obligations. Medical obligations. Losing science students because of funding difficulties.	
Pew Scholars Program in the Biomedical Sciences	61
Selection process. Funding people versus projects. Collaborations stemming from the award. NIH funding.	
Funding	70
Translational Research. Role of MD/PhDs in research.	
Biomedical Sciences	79
Definition and role of biomedical science. Patents. Scientific publishing. Public understanding of science. Scientific education. Collaborations.
