

CHEMICAL HERITAGE FOUNDATION

MARK B. VAN DOREN

Pew Scholars in the Biomedical Sciences

Transcript of an Interview
Conducted by

David J. Caruso

at

Johns Hopkins University
Baltimore, Maryland

on

26 and 27 November 2007
(With Subsequent Corrections and Additions)

ACKNOWLEDGEMENT

This oral history is part of a series supported by a grant from the Pew Charitable Trusts based on the Pew Scholars Program in the Biomedical Sciences. This collection is an important resource for the history of biomedicine, recording the life and careers of young, distinguished biomedical scientists and of Pew Scholars Program in the Biomedical Sciences Advisory Committee members.

This oral history is made possible through the generosity of

CHEMICAL HERITAGE FOUNDATION
Oral History Program
FINAL RELEASE FORM

This document contains my understanding and agreement with the Chemical Heritage Foundation with respect to my participation in the audio-recorded interview conducted by David Caruso on 26 and 27 November 2007. I have read the transcript supplied by Chemical Heritage Foundation.

1. The audio recording, corrected transcript, photographs, and memorabilia (collectively called the "Work") will be maintained by the Chemical Heritage Foundation and made available in accordance with general policies for research and other scholarly purposes.
2. I hereby grant, assign, and transfer to the Chemical Heritage Foundation all right, title, and interest in the Work, including the literary rights and the copyright, except that I shall retain the right to copy, use, and publish the Work in part or in full until my death.
3. The manuscript may be read and the audio recording(s) heard by scholars approved by the Chemical Heritage Foundation subject to the restrictions listed below. The scholar pledges not to quote from, cite, or reproduce by any means this material except with the written permission of the Chemical Heritage Foundation.
4. I wish to place the conditions that I have checked below upon the use of this interview. I understand that the Chemical Heritage Foundation will enforce my wishes until the time of my death, when any restrictions will be removed.

Please check one:

a. _____

No restrictions for access.

NOTE: Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to obtain permission from Chemical Heritage Foundation, Philadelphia, Pennsylvania.

b. _____

Semi-restricted access. (May view the Work. My permission required to quote, cite, or reproduce.)

c. _____

Restricted access. (My permission required to view the Work, quote, cite, or reproduce.)

This constitutes my entire and complete understanding.

(Signature) _____

Mark B. Van Doren

(Date) _____

7/31/09

This interview has been designated as **Semi Restricted Access**.

One may view the oral history with the permission of CHF.
However, the permission of the interviewee is required to quote from, cite, or reproduce the oral history.

Please contact CHF to request permission.

The Chemical Heritage Foundation (CHF) serves the community of the chemical and molecular sciences, and the wider public, by treasuring the past, educating the present, and inspiring the future. CHF maintains a world-class collection of materials that document the history and heritage of the chemical and molecular sciences, technologies, and industries; encourages research in CHF collections; and carries out a program of outreach and interpretation in order to advance an understanding of the role of the chemical and molecular sciences, technologies, and industries in shaping society.

MARK B. VAN DOREN

1965 Born in Syracuse, New York on 3 September

Education

1983-1987 Cornell University, B.A. with distinction, Biology
1989-1994 University of California, San Diego, Ph.D., Biology

Professional Experience

1987-1989 Oncogene Science, Manhasset, New York
Research Technician

1994-1996 Whitehead Institute for Biomedical Research, Cambridge, Massachusetts,
Post-doctoral Fellowship, Dr. Ruth Lehmann

1996-1999 Skirball Institute for Biomolecular Medicine, New York, New York
Post-doctoral Fellowship, Dr. Ruth Lehmann

1999-2006 Johns Hopkins University
Assistant Professor, Department of Biology
2006-present Associate Professor, Department of Biology
2006-present Co-Director, Graduate Program in Cellular, Molecular and
Developmental Biology and Biophysics

Honors

1992 Society for Developmental Biology Award for
Achievement in Embryology

1994 Howard Hughes Medical Institute Research Associate

1995 Finalist, Larry Sandler Award (International competition for thesis
work in *Drosophila*)

1995-1997 American Cancer Society Postdoctoral Fellowship

1998 Howard Hughes Medical Institute Research Associate

2000-2004 Pew Scholars Award

ABSTRACT

Mark D. Van Doren was born and raised in upstate New York with his three siblings. Although Van Doren's father was a physician, he did not discuss medicine or science at home much; Van Doren's interest in biology developed mainly during the course of his high school science classes. He undertook summer research in photoporphyrin derivatives at Roswell Park Cancer Institute in Buffalo, New York in an attempt to further this interest in biology.

After matriculating at Cornell University—a family tradition—Van Doren began research with Efraim Racker in the field of bioenergetics. While working with Racker, Van Doren was exposed to some of the complexities of scientific practice, including research ethics and the need for experimental replication and validation. During his time at Cornell, he was able to publish a paper in a scientific journal, an experience that helped him decide upon laboratory science as his career. After graduating from Cornell, Van Doren worked at Oncogene Science prior to starting graduate work at the University of California, San Diego.

While doing a rotation in James W. Posakony's laboratory, Van Doren developed an interest in *Drosophila*; he then decided to pursue research on the biochemistry of *Drosophila* BHLH proteins for his degree, which quickly resulted in a 1991 *Development* paper. In an effort to expand his interest in and knowledge of relevant science early in his graduate career, Van Doren studied at the Woods Hole Marine Biological Laboratory taking a course on embryology. He did his postdoctoral research with Ruth Lehmann, first at the Whitehead Institute for Biomedical Research and then at the Skirball Institute for Biomolecular Medicine. In the Lehmann laboratory, Van Doren began his work on *Drosophila* germ cells that had first peaked his interest at Woods Hole. His HMG-CoA reductase work led to a 1998 *Nature* publication.

Upon completing his post-doctoral research, Van Doren accepted a position at Johns Hopkins University where he has continued his *Drosophila* research. He received the Pew Scholars in the Biomedical Sciences award shortly after starting as a principal investigator, an award that provided him validation as a young researcher. Throughout the interview Van Doren discussed his current research, the challenges of running a laboratory, and funding.

INTERVIEWER

David J. Caruso earned a B.A. in the History of Science, Medicine, and Technology from the Johns Hopkins University in 2001 and a Ph.D. in Science and Technology Studies from Cornell University in 2008. His graduate work focused on the interaction of American military and medical personnel from the Spanish-American War through World War I and the institutional transformations that resulted in the development of American military medicine as a unique form of knowledge and practice. David is currently the Program Manager for Oral History at the CHF. His current research interest focuses on the discipline formation of biomedical science in 20th-century America and the organizational structures that have contributed to such formation.

TABLE OF CONTENTS

Childhood	1
Upstate New York. Physician father. Biology interest in high school. Summer research at Roswell Park Cancer Center.	
College Education	10
Cornell University. Family history at Cornell. Prominent medical issues of the 1980s. Laboratory research with Efraim Racker. Publishing as an undergraduate. Scientific ethics and Mark Spector. Oncogene Science after Cornell graduation.	
Graduate Education	27
University of California, San Diego. James W. Posakony. <i>Drosophila</i> proteins and biochemistry. Woods Hole Marine Biological Laboratory course in embryology. Publishing. Process of writing	
Post-doctoral Research	38
Ruth Lehmann. Transition to genetic screening. Lack of laboratory hierarchy. Transition from Whitehead Institute for Biomedical Research to the Skirball Institute for Biomolecular Medicine.	
Principal Investigator	49
Searching for positions at same time as wife. Johns Hopkins University. Continuing <i>Drosophila</i> research. Running a laboratory. Teaching. Dividing post-doctoral research with Lehmann. Publishing.	
Pew Scholars Program in the Biomedical Sciences	59
Pew Scholars Award. Local Scholars. Scientific momentum and validation. Annual Meetings. Policy issues. Potential collaborations.	
Funding	66
NIH funding. Preliminary Data. Potential Significance.	
Biomedical Science	69
Instrumentation. Changing technology. Bioethics and research. Publishing. Hierarchy of scientific journals. Image of the scientist. Society for Developmental Biology.
